Education

Bachelor of Science in Computer Science Dec 2027
Georgia Institute of Technology, Atlanta, GA *GPA: 3.95*

- Concentrations: Artificial Intelligence and Theory
- Courses: Efficient Machine Learning, Intro to AI, Computer Organization, Data Structures and Algorithms, OOP

Experience

Apple May 2026 – Aug 2026
Software Engineering Intern *Cupertino, CA*

- Automated metrics for CI tooling support by building a Slack bot module in Python (Bolt) that ingests requests and pushes data via S3 to Snowflake, eliminating manual metric collection and saving 150+ engineering hours annually
- Modeled 30+ operational metrics with dbt SQL transformations on Snowflake, surfacing trends via Streamlit UI
- Built an ML pipeline that strips PII from support requests, clusters them with HDBSCAN, and applies LLM-generated labels via cluster sampling, surfacing 60+ issue categories to guide tooling and documentation priorities
- Built an MCP-enabled Claude skill to generate reports from Snowflake, enabling on-demand metric summaries

Vantaca + HOAi (YC W22) May 2025 – Dec 2025
Software Engineering Intern *Wilmington, NC*

- Built a LangGraph agent microservice triggered on Jira updates that auto-generates documentation from git PRs and org context via semantic search, accelerating doc workflows by 3× across 50+ tickets/week, monitored in LangSmith
- Deployed agent via dockerized Azure Function with CI/CD pipeline, achieving 95% quality score in tech writer evals
- Architected hosted MCPs via Azure App Services with custom OAuth for secure LLM knowledge access by 200+ staff

Graph Computation and Machine Learning Lab - Georgia Tech Nov 2025 – Present
ML Research Intern *Atlanta, GA*

- Developing a framework to improve privacy guarantees in graph neural networks under complex sampling settings, extending prior single-step methods to multi-step scenarios; co-first author on in-progress paper
- Designed a graph partitioning approach that reduces sensitivity to node degree, enabling stronger node-level privacy
- Built a scalable PyTorch Geometric pipeline with H200 GPUs and SLURM jobs, training on large-scale graphs (2.4M nodes, 124M edges) while maintaining $\sim$ 95% accuracy retention under various differential privacy constraints

Assistive Intelligence Lab - Georgia State University May 2023 – Present
ML Research Intern *Atlanta, GA*

- Developed NRA-Embed, a noise-robust annotator embedding method combining annotator-aware representations with robust contrastive loss, boosting performance on NLP classification tasks by up to 12% F1 over SOTA on 3 datasets
- Led ACL '26 submission on separating annotator disagreement from annotation noise in subjective classification
- Deployed PyTorch ML pipelines on a Linux-based on-premise cluster (1–12 GPUs), reducing training time by 80%

Projects

ChatGT - GT/NVIDIA AI Makerspace Nexus | *React, TypeScript, Node.js, Ollama, SQLite* Aug 2025 – Dec 2025

- Built fully local LLM study aid with React, TypeScript, and Node.js, using real-time responses via Server-Sent Events
- Developed model comparison interface for A/B testing with user preference tracking across 3 models stored in SQLite
- Built 7+ Canvas LMS tools for natural language queries on coursework, with JWT authentication for user-profiles
- Deployed on AI Makerspace GPU clusters, implementing port conflict detection (lsof, netstat) utilizing fallback ports

Event Tracking Platform - Alpha Kappa Psi | *Rust, React, MongoDB, AWS Lambda* Dec 2024 – Dec 2025

- Built event tracking app in Rust & React with MongoDB and REST APIs on AWS Lambda, serving 300+ active users
- Led a 9-engineer team through Agile sprints as project manager, shipping real-time check-ins, feedback, and interview scheduling features that cut manual tracking time by 70%

Skills & Honors

Programming: Python, Java, C/C++, Rust, Swift, TypeScript, JavaScript, SQL, React
ML & AI: PyTorch, PyTorch Geometric, LangGraph, OpenCV, Ollama, MCP, Opacus, Scikit-learn, Pandas
Data & Infra: Snowflake, dbt, AWS, Azure, GCP, Docker, SLURM, MongoDB, SQLite, Streamlit, Firebase
Honors: Zell-Miller (Full-Tuition Scholarship); National Merit Scholar ($2500); Best Solo Hack, HackGwinnett
